Using a working set limited to 900 pages and 87 pages of data storage (excluding image)

Total number object records read (both passes): 585
 of which 151 were in libraries and 0 were DEBUG data records containing 0 bytes

Number of modules extracted explicitly = 0
 with 6 extracted to resolve undefined symbols

74 library searches were for symbols not in the library searched

A total of 8 global symbol table records was written
